

MCA/BCA
Specialization in Cyber Security
(In association with EC Council, USA)

Cybersecurity is a rapidly expanding field. As the risk of cyber-attacks is greater than ever, companies are fighting to fill their ranks with professionals that can protect their information and networks. According to a study, India witnessed a staggering 675% increase in cyber-crime related incidents under the IT Act, 2000, between 2016 and 2018. Another report indicates that at least one cyber-crime was reported every 09 minutes in India in 2019, up from 12 minutes in 2018.

The rate at which developments are happening means a cybersecurity experts need to constantly update with not only the latest tools and gadgets to hit the market, but also with the latest trends and happenings in the domain Talking specifically about India, NASSCOM predicts that India would need over one million cyber security professionals by 2020. This overwhelming need for cyber security experts in India is not surprising, though.

MCA/BCA programs with specialization in Cyber Security aim to help bridge this gap between demand and supply, backed by internationally recognized certifications from EC-Council (the world's largest Cyber Security Technical Certification Body). On completion of the degree programs, students will earn global certification courses like ECSS, CND, CEH, CASE and many more from EC-Council. The graduates will get a chance to work in top corporates having roles like Network Security Engineer, Cyber Security Analyst, Security Architect, Cyber Security Manager, and many more.

Highlights:

- Curriculum designed by industry experts and academicians to strike balance between theory and practical.
- The course covers all important contents of Cyber Security as per industry demands.
- Students will earn global certifications like ECSS, CND, CEH, CASE from EC-Council, USA.
- Personal doubt clearing sessions would be conducted with experts for all the learner.
