Reason for establishment of off campus and justification:

1. **Expanding Access to Higher Education:**

   India's Gross Enrollment Ratio (GER) in higher education is only 28.3%, while the national goal is to raise it to 50% by 2035. In Rajasthan, the GER is slightly higher at 28.6% but still below the national target. Establishing an off-campus in Alwar will help increase access to higher education, particularly in underserved regions like Alwar and its surroundings, contributing to the country's GER objectives.

2. **Addressing Regional Educational Needs:**
   Rajasthan has approx. 90 Universities, yet the demand for quality higher education remains unmet, especially in the NCR-adjacent areas. An off-campus in Alwar will provide quality education opportunities for students from surrounding cities (Agra, Mathura, Bharatpur, Rewari, etc.), reducing the need for students to travel out of state for higher studies.

3. **High Unemployment and Need for Skill Education:**

   Alwar, located in the well-known Mewat region, is a socially and economically backward area where a large number of youth remain unemployed. The key reasons include low educational attainment, limited access to quality higher education, and a mismatch between students' skills and the requirements of nearby industrial hubs such as Bhiwadi and Neemrana. Establishing the Off-Campus of JECRC University in Alwar aims to address these challenges by providing access to quality education and industry-oriented skill development at the doorstep of local students. This initiative will enhance their employability, promote local industry linkage, and contribute significantly to the socio-economic upliftment of the people of the Mewat region.

4. **Proximity to NCR and Industry Alignment:**

   Alwar's strategic location near the NCR makes it ideal for offering academic programs that align with the industrial and economic growth in the region. This proximity will enable students to benefit from internship and placement opportunities in one of India's largest economic hubs, improving their employability.

5. **Bridging the Skills Gap:**

   Rajasthan's industrial sector faces a shortage of skilled professionals. JECRC University's off-campus in Alwar will offer industry-aligned programs, particularly in fields like Engineering, Computer Science, AI, and Cybersecurity, which will prepare students to meet the demands of local industries and address the region's skills gap.

6. **Proven Success in Employment and Placements:**

   JECRC University has a proven track record of eligible students securing placements annually. Establishing an off-campus in Alwar will replicate this success by providing skilled graduates to meet the demands of the NCR and Rajasthan industrial sectors.

7. **Fostering Research and Innovation:**

   With JECRC's strong focus on research, the Alwar campus will foster a research-driven academic environment that supports applied research to solve real-world industrial problems, further contributing to the region's development.

Registrar
JECRC University, Jaipur-303905

8. **Supporting Entrepreneurship and Economic Growth:**

   JECRC's Entrepreneurship Development and Incubation Centre has nurtured numerous startups. Expanding this initiative to Alwar will support local entrepreneurship, driving economic growth in the region while also offering students hands-on entrepreneurial experience.

9. **Community Engagement and Holistic Student Development:**

   Through various clubs, societies, and community engagement programs, JECRC promotes not just academic skills but also social and leadership skills. An off-campus in Alwar will foster a vibrant academic community and contribute to the overall development of students.

10. **Catering to Future Industry Trends:**

    The Alwar off-campus will anticipate future trends by offering programs in emerging fields like AI, Data Analytics, and Cloud Computing. This will ensure that graduates are equipped with skills that meet not only current but also future industry demands.

11. **Enhanced National and International Exposure:**

    Students at the Alwar campus will benefit from national and international training opportunities, helping to elevate their global competitiveness and adding value to the region's talent pool.

These academic reasons highlight the need and potential benefits of establishing the off-campus in Alwar, ensuring regional educational development while supporting the broader goal of increasing India's GER and meeting industry demands.

REGULATIONS GOVERNING EXAMINATION IN JECRC UNIVERSITY, JAIPUR

In continuation to chapter 6 of JECRC University ordinances, following rules and regulations governing academic evaluation under CGPA scheme at JECRC University are as follows:

1. Introduction

JECRC University is committed to develop an efficient and flexible continuous evaluation system with emphasis on a high quality teaching-learning process. The CGPA (Cumulative Grade Point Average) system of evaluation which has built-in continuous and comprehensive evaluation shall be adopted for all programmes offered by the University. In this system, a student is awarded a letter grade based on his/her performance in a subject over the semester relative to the performance of other students in that subject. These letter grades will also carry a numeric equivalent termed as grade point. The grade point multiplied by the credits of the subject gives the grade points earned by a student in a given subject. The weighted average of the grade points earned by a student in a semester is termed as GPA of the student in that semester. The weighted average of the GPAs of all semesters completed by the student is termed as the CGPA of the student at that point. The CGPA on completing all the semesters and all credits for all semesters of the course will be termed as the CGPA of the student in the course/programme. The system is discussed in detail in the subsequent sections.

2. Curriculum/Program of Study

2.1. Curriculum: Every Department offering a course has a prescribed course structure which in general terms is known as Curriculum. It prescribes courses to be studied in each semester. The courses of study bulletin will be updated at regular intervals and made available on University web site for all courses offered by the University.

2.2. Course Credit System: In general a certain quantum of work measured in terms of credits is laid down as the requirement for a particular degree. The student acquires credits by passing courses every semester, the number of credits associated with a subject being dependent upon the number of hours of instruction per week in that subject. In general, credits for a subject will be obtained by using a multiplier of unit (1) for lecture, tutorial and laboratory hours. Thus, for example, a theory subject having 3 lectures and one tutorial per week throughout the semester carries four credits. Similarly, a laboratory subject having two laboratory hours per week throughout the semester carries two credits. Credits will also be assigned to Practical Training, Seminars and Projects etc.

2.3. Credits requirement and normal duration for courses: A student has to earn a minimum number of credits to get a particular degree. The detailed break-up of subject-wise credits will be specified in the courses of study. Normally each semester (90 clear teaching days) will be of 25 credits (roughly 400 teaching hours). Minimum number of credits to be earned by a student to get a degree and the normal duration for such courses will be as per BOS approved by teaching department.

2.4 ***Semesters – Odd, Even & Summer (Extra):*** The University will follow a specialized credits based semester system. There will be two semesters in a year. The semester that begins in July/Aug will be known as Odd Semester and the Semester that begins in January as Even Semester. During the summer vacation i.e. (May-July), there will be an additional semester known as Summer Semester or Extra Semester for summer courses, self study courses (subject to availability and consent of faculty), students with attendance shortage during normal semester etc. to provide an opportunity to clear backlog courses. The details about conduct of Extra Semester are given in Section 7.

3. Attendance Requirement:

3.1. ***Requirement for Odd/Even Semesters:*** A student must maintain an attendance of at least 75% in each subject. Any student not fulfilling the above requirement will not be allowed to appear in the end-semester examination and will be detained. He/she will have to repeat the course and fulfill the attendance requirement before being allowed to appear for the end-semester examination.

3.2. ***Requirement for Summer (Extra) Semester:*** A student must maintain a minimum of 75% attendance in each subject for which he/she has registered in the extra semester. Any student not fulfilling the above requirement will not be allowed to sit in the end-semester examination for that subject. However, he/she will be allowed to appear in the other subject(s) registered for, in which the requirement of attendance was fulfilled earlier.

3.3. ***Special Condonation:*** In exceptional cases, the shortage of attendance may be condoned by the President up to a maximum of 5% of the total number of classes held for the subject. This will be done strictly on Medical grounds or on extreme compassionate grounds. For condonation on medical grounds, the medical certificate will be from a hospital and will be scrutinized by a committee appointed by the University. Such certificates must be submitted to the Dean/HOD within a week of return to the Institute. Certificates submitted after the said period shall not be entertained on any account.

4. Assessment and Examination

4.1. ***Assessment Procedure:*** All courses undertaken by students will be evaluated using a system of continuous assessment. The students will be evaluated on class/tutorial participation, assignment work, laboratory

work, class tests, quizzes and sessional examinations which together will constitute the In-Semester Assessment. In addition, the students will also have to appear in the end-semester examination in all the theory subjects as per the course of study. 50% weightage will be for in-sem assessment and 50% for end-sem exam. The detailed procedure of evaluation and award of grades is discussed below.

4.2. ***In-Semester Assessment:*** The weightage for the In-Semester assessment through the various modes listed above will normally be as follows:

There will be only two in-sem (sessional) examinations of one and a half hour duration for each theory subject to be held as per the schedule fixed in the Academic Calendar. There will be only one make up In Sem Examination conducted for students who have missed In Sem due to medical reasons, genuiness of medical relief will be decided by a committee at school level comprising Director of School (as Chairman) and HODs as members. In addition, two quizzes and assignments/term papers/viva-voce and regularity in attendance shall make up the rest of the in-semester assessment. The in-sem examinations for the theory subjects will normally be conducted for 50 marks and the standard of questions should normally be equivalent to those set in the end-semester examination. However, Objective type questions/MCQs may be preferred for quizzes.
The assessment in laboratory subjects will be based on the student's performance in the practicals during the session. Each practical will be graded. There will normally be 12 practicals in a semester. Ten best grades awarded to a student, out of the 12, will be considered for deciding the grade of the student.

The in-semester assessment in case of drawing subjects (e.g. Engineering Graphics, Mechanical Drawing etc.) will be based on the class work, assignments and mid-term tests/sesionals.

20 Marks will be awarded for assignment and attendance. The break up will be as followed
(a) 20 Marks will be awarded for class assignment.

The relative weightage of various components will be as follows:

Evalaution Method	Marks	Out Of	Weightage	Remarks
1st In Sem	15	50	30%	Compulsory
2nd In Sem	15	50	30%	Compulsory
3rd In Sem	15	50	30%	Optional
Assignment	20	20	100%	Compulsory
End Sem	50	100	50%	Compulsory

Registrar

JECRC University JAIPUR

If a student is detained due to shortage of attendance in a subject, he/she will not be awarded any in-semester assessment for the subject. The marks secured by him/her in various components (viz., test, sessionals, quizzes etc) will be treated as null and void.

4.3. End-semester Examination: It is mandatory for the students to appear in the end- semester examination to be eligible for evaluation of grades. Papers will be examined by Internal examiners (preferably the subject teachers). However, for evaluation of projects and theses, external examiners may be invited. Personal-seeing and reevaluation of end-semester answer-scripts (theory papers) may be done following the procedure laid down in Section 8.
End Semester regular examinations will be conducted at the end of the each semester. Back examinations will be held at the same time for the current semester and thereafter for all other semesters. Only registered students will be allowed to appear in back examinations.

Final year Internship Assessment- Final year internship assessment will be carried out by committee consisting of internal and external examiners. The committees will be constituted by the chairman of the Board of Studies.

All examinations are conducted centrally under supervision of Controller of Examinations. Controller of Examinations will be supported by the Deputy Controller of Examinations, Assistant Controller of Examinations and other supporting staffs.

4.4. ***a) Grading System(For Batch admiteed till 2021):*** For every subject taken by a student he/she is awarded a grade based on his/her overall performance over the semester in that subject. These grades are described by the letters A+, A, B, C, D, E and F, each of which not only indicates a qualitative assessment of the student's performance but also carries a quantitative (numeric) equivalent called the grade point as given below:

Letter Grade	A+	A	B	C	D	E	F	I
Grade Point	10	9	8	7	6	5	0	-

A student passes the subject if he/she gets any grade in the range of A+ to E. A student is awarded 'I' grade in a theory/laboratory subject if he/she has not satisfied the attendance criterion or has satisfied the attendance

requirement & in-semester performance, but does not appear in the end- semester examination due to valid reasons to be applied for before the exam. A student who has satisfied the attendance and in-sem performance but does not appear in the end-sem exam without any valid reasons will be awarded 'F' grade in that subject.

b) Grading System(For Batch admiteed from 2022 onward): For every subject taken by a student he/she is awarded a grade based on his/her overall performance over the semester in that subject. These grades are described by the letters O, A+, A, B, C, D, E and F, each of which not only indicates a qualitative assessment of the student's performance but also carries a quantitative (numeric) equivalent called the grade point as given below:

Letter Grade	O	A+	A	B	C	D	E	F	I
Grade Point	10	9.5	9	8	7	6	5	0	-

A student passes the subject if he/she gets any grade in the range of O to E. A student is awarded 'I' grade in a theory/laboratory subject if he/she has not satisfied the attendance criterion or has satisfied the attendance requirement & in-semester performance, but does not appear in the end- semester examination due to valid reasons to be applied for before the exam. A student who has satisfied the attendance and in-sem performance but does not appear in the end-sem exam without any valid reasons will be awarded 'F' grade in that subject.

4.5. ***Award of Grades: (For Batch admiteed till 2021):*** For award of grades A+, A, B, C, D, E and F, a relative grading system has been adopted. This system is based on the statistical analysis of the total marks using mean (μ) and standard deviation (σ). The detailed procedure is as follows:

(i) Total marks out of 100 will be obtained giving equal weightage to the in-semester assessment (50%) and end-semester examination marks (50%). These components will not be separately rounded off even after being scaled down as per their weightage. The total marks (out of 100) will be rounded off and the grades will be decided and applied on these marks.

(ii) Those students, who have not appeared in the end-semester examination, will not be included while calculating mean and standard deviation. Also, outliers will be removed before calculating the mean and standard deviation. Procedure for finding the outliers will be as follows:

- Class Size; $N_{Total.}$
- Arrange marks in descending order.

Registrar
JECRC University, Jaipur-303905

JECRC University JAIPUR

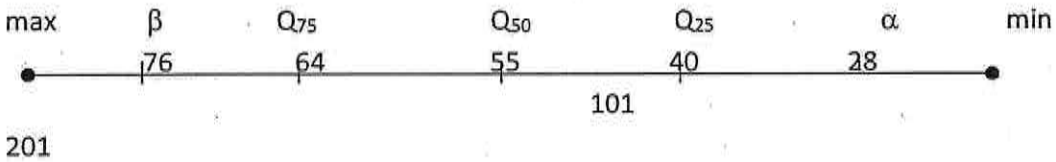
- p^{th} percentile is defined as Q_p where p% of the students have marks below Q_p. If there is more than one such number, the p^{th} percentile is defined as the average of the numbers, midpoint of that interval.
- Find the median of marks; Q_{50}
- Find Q_{25} (lower quartile) Q_{75} (upper quartile), and inter quartile range, $\Delta = Q_{75} - Q_{25}$
- Find the statistical outliers; Those having marks below α ($\alpha = Q_{25} - \Delta/2$ and above β ($\beta = Q_{75} + \Delta/2$)
- Statistical outliers are dropped (i.e., those with marks $< \alpha$ and $> \beta$ are dropped) to find the modified size of class ($N_{modified}$)
- Mean & SD are computed after dropping the outliers for $N_{modified}$; Total number of data points remaining after dropping the outliers.

$$Mean \quad m = \frac{1}{N_{modified}} \sum x_i$$

$$SD \quad \sigma = \sqrt{\frac{1}{(N_{modified} - 1)} \sum (x_i - m)^2}$$

Example:

Consider the example $N_{Total} = 201$



- Find the median mark Q_{50} (55 marks)
- Find Q_{75} (64 marks) and Q_{25} (40 marks)

- Find $\Delta = Q_{75} - Q_{25} = 24$ marks,

$\alpha = Q_{25} - \Delta/2 = 28$ marks and

$\beta = Q_{75} + \Delta/2 = 76$ marks

- Statistical outliers are dropped (marks >76 and marks < 28)

- Find $N_{modified}$= No of students having marks $\beta \leq$ marks $\leq \alpha$

- Mean & SD are computed after dropping the outliers for $N_{modified}$

Cut off's for A+ and E are decided as given below

- **Cutoff for A+ (m is mean, σ is Standard Deviation)**

Registrar
JECRC University, Jaipur-303905

JECRC University JAIPUR 303905

- If $m + 1.5*\sigma \geq 100$ cutoff for A+ is 100.
- If $m + 1.5*\sigma \leq 75$ cutoff for A+ is 75.
- Else cutoff for A+ is $m + 1.5*\sigma$

- **Cutoff for E**
  - If $m - 2*\sigma \geq 50$ cutoff for E is 50.
  - If $m - 2*\sigma \leq 35$ cutoff for E is 35.
  - Else cutoff for E is $m - 2*\sigma$
- Minimum marks for passing end-semester (Theory): 35 out of 100
- Cut off's of other grades are decided by linearly dividing the range of marks between A+ and E.
- Cut offs are to be rounded to the nearest integer.
- For Grades A, B, C and D; Cut off mark x is re-fixed by looking the neighborhood density (by looking at number of students having marks x, x-1 & x-2, cut off mark is set to the one with maximum density).
- Pre-fixed bounds are applicable (i.e, 35 and 50 for E; 75 and 100 for A+ and separate minimum of 35% for end-semester examination).

Note: Outliers are removed only for the purpose of calculating mean and standard deviation. Subsequently the results are applied to all the students.

(iii) The cut-off for E and A+ grades will be $\mu - 2*\sigma$ and $\mu+1.5*\sigma$ respectively.

(iv) In case $\mu - 2*\sigma$ is less than 35, the lower cut-off for E grade will be 35. Also, in case $\mu - 2*\sigma$ is more than 50, then the lower cut-off for E grade will be brought down to 50.

(v) In case $\mu + 1.5*\sigma$ is higher than 100, the upper cut-off will be brought down to 100.

Also in case $\mu + 1.5*\sigma$ is less than 75, the upper cut-off will be fixed at 75.

(vi) The range between the lower and the upper cut-off as decided by (iii), (iv) and (v) above, will be divided by 5 to get the step size for deciding other grades.

(vii) $\mu - 2*\sigma$ (rounded off) is greater than 35 then lower limit of E grade will be brought down to 35 so E grade will have extended range. Any student getting marks below 35 will be awarded F grade.

(viii) The lower limit of D, C, B, and A will be obtained by adding 1, 2, 3, and 4 step sizes to the lower limit as obtained by Cl. (iii) above. These limits will be rounded off after adding the step sizes and will be used as cut-off for awarding respective grades.

(ix) $\mu + 1.5*\sigma$ (rounded off)/ 75/100 will be the lower limit of A+ grade as per Cl. (v) above. A+ grade will be awarded to only 10% students so if more students

Registrar
JECRC University, Jaipur-303905

JECRC University JAIPUR 303905

are falling in the A+ range then A+ range will be shifted upward to have 10% A+ so A grade will have extended range. Number of 10% students in the class will be calculated using roundup. For example 12 student in class means 2 students can get highest grade.

(x) For detained and failed students absolute grading system will be used in all semesters as given below:

CALCULATION OF ABSOLUTE GRADING

Grade	A+	A	B	C	D	E	F
Marks	≥ 90	80 - 89	70 - 79	60 - 69	50 - 59	35 - 49	< 35

(xi) In case the number of students is too small (less than 30), and relative grading on the basis of statistical parameters is not feasible, a modified absolute grading scheme as given below will be followed.

CALCULATION OF MODIFIED ABSOLUTE GRADING

THEORY SUBJECT

Step 1 : A+ grade to be awarded only <=10% of the class who are above Upper Cutoff and minimum Upper Cutoff is 75. Number of 10% students in the class will be calculated using roundup. For example 12 student in class means 2 students can get highest grade.

Step 2: Case I- (more than 10% students are above or equal to 75)

If a next higher mark scored is more than 75 then actual scored number will be treated as next higher number for example if the next scored marks is 81 then subtract 34 from 81 (81-34=47). Then divide 47 by 5 (because there are five grades A, B, C, D, E), which will be equal to '9.4' that is the class-Interval.

Add 9.4 (1 Delta) to 34 = 43.4 = 43, then the range will be as follows:-

Case-I	
Add	09.4 to 34 = 43.4 = 43
Add	18.8 to 34 = 52.8 = 53
Add	28.2 to 34 = 62.2 = 62
Add	37.6 to 34 = 71.6 = 72

Case II: (less than 10% students are above or equal to 90)

If next higher marks scored less than 75 then 75 will be fixed as next higher number for example if the next scored marks is 70 then subtract 34 from 75 = 41

Registrar
JECRC University, Jaipur-303905

JECRC University JAIPUR

than divide 41 by 5 (because there are five grades A, B, C, D, E), which will be equal to '8.2' that is the class-Interval

Add 8.2 (1 Delta) to 34 = 42.2 = 42, then, the range will be as follows:-

Case-II	
Add	08.2 to 34 = 42.2
Add	16.4 to 34 = 50.4
Add	24.6 to 34 = 58.6
Add	32.8 to 34 = 66.8

The grade calculation is as follows:-

Case I	Grade	Case II
35-43	E	35-42
44-53	D	43-50
54-62	C	51-59
63-72	B	60-67
73-81	A	68-74
82-100	A+	75-100

Then allot grades on the scores obtained by the students.

LAB SUBJECT

Lab Grading: Marks will be submitted out of 100 and system of relative/absolute/modified absolute grading will be followed as per theory papers. Two evaluation methods will be used as follows:-

a. In semester- 50 marks
b. End semester-50 marks

The teacher in consultation with his HOD will decide the cut off marks for grades. Any other peculiarities may also be taken care of by having a discussion with the HOD/HOI.

(xi) In the end semester examinations student will be treated as 'Failed,' if the marks are less than 35%.

(xii) For failed students maximum grade allowed is C.

(xiii) In all grading system, less than or equal to 10% of the class will get A+ provided they have scored 75%. However if last student of 10% A+ range is having students at the same number then they will also get A+ and we will have more than 10% A+ grade in this case. Number of 10% students in the class will be

calculated using roundup. For example 12 student in class means 2 students can get highest grade.

Note: For AHS department subjects Passing marks is 50% in End Sem as well as in Total marks also 50%. So lower cutoff will be 50 for passing in AHS subjects.

Award of Grades: (For Batch admiteed from 2022 onward): For award of grades O, A+, A, B, C, D, E and F, a relative grading system has been adopted. This system is based on the statistical analysis of the total marks using mean (μ) and standard deviation (σ). The detailed procedure is as follows:

(i) Total marks out of 100 will be obtained giving equal weightage to the in-semester assessment (50%) and end-semester examination marks (50%). These components will not be separately rounded off even after being scaled down as per their weightage. The total marks (out of 100) will be rounded off and the grades will be decided and applied on these marks.

(ii) Those students, who have not appeared in the end-semester examination, will not be included while calculating mean and standard deviation. Also, outliers will be removed before calculating the mean and standard deviation. Procedure for finding the outliers will be as follows:

- Class Size; $N_{Total.}$
- Arrange marks in descending order.
- p^{th} percentile is defined as Q_p where p% of the students have marks below Q_p. If there is more than one such number, the p^{th} percentile is defined as the average of the numbers, midpoint of that interval.
- Find the median of marks; Q_{50}
- Find Q_{25} (lower quartile) Q_{75} (upper quartile), and inter quartile range, $\Delta = Q_{75} - Q_{25}$
- Find the statistical outliers; Those having marks below α ($\alpha = Q_{25} - \Delta/2$ and above β ($\beta = Q_{75} + \Delta/2$)
- Statistical outliers are dropped (i.e., those with marks $< \alpha$ and $> \beta$ are dropped) to find the modified size of class ($N_{modified}$)
- Mean & SD are computed after dropping the outliers for $N_{modified}$; Total number of data points remaining after dropping the outliers.

$$Mean \quad m = \frac{1}{N_{modified}} \sum x_i$$

  - Else cutoff for O is $m + 2*\sigma$
- **Cutoff for E**
  - If $m - 2*\sigma \geq 50$ cutoff for E is 50.
  - If $m - 2*\sigma \leq 40$ cutoff for E is 40.
  - Else cutoff for E is $m - 2*\sigma$
- Minimum marks for passing end-semester (Theory): 40 out of 100
- Cut off's of other grades are decided by linearly dividing the range of marks between O and E.
- Cut offs are to be rounded to the nearest integer.
- For Grades A+, A, B, C and D; Cut off mark x is re-fixed by looking the neighborhood density (by looking at number of students having marks x, x-1 & x-2, cut off mark is set to the one with maximum density).
- Pre-fixed bounds are applicable (i.e, 40 and 50 for E; 90 and 100 for O and separate minimum of 35% for end-semester examination).

Note: Outliers are removed only for the purpose of calculating mean and standard deviation. Subsequently the results are applied to all the students.

(iii) The cut-off for E and O grades will be $\mu - 2*\sigma$ and $\mu+2*\sigma$ respectively.

Registrar
JECRC University, Jaipur-303905

JECRC University JAIPUR

(iv) In case $\mu - 2*\sigma$ is less than 40, the lower cut-off for E grade will be 40. Also, in case $\mu - 2*\sigma$ is more than 50, then the lower cut-off for E grade will be brought down to 50.

(v) In case $\mu + 2*\sigma$ is higher than 100, the upper cut-off will be brought down to 100.

Also in case $\mu + 2*\sigma$ is less than 90, the upper cut-off will be fixed at 90.

(vi) The range between the lower and the upper cut-off as decided by (iii), (iv) and (v) above, will be divided by 6 to get the step size for deciding other grades.

(vii) $\mu - 2*\sigma$ (rounded off) is greater than 40 then lower limit of E grade will be brought down to 40 so E grade will have extended range. Any student getting marks below 40 will be awarded F grade.

(viii) The lower limit of D, C, B, A and A+ will be obtained by adding 1, 2, 3, 4 and 5 step sizes to the lower limit as obtained by Cl. (iii) above. These limits will be rounded off after adding the step sizes and will be used as cut-off for awarding respective grades.

(ix) $\mu + 2*\sigma$ (rounded off)/ 90/100 will be the lower limit of O grade as per Cl. (v) above. O grade will be awarded to only 10% students so if more students are falling in the O range then O range will be shifted upward to have 10% O so A+ grade will have extended range. Number of 10% students in the class will be calculated using roundup. For example 12 student in class means 2 students can get highest grade.

(x) For detained and failed students absolute grading system will be used in all semesters as given below:

CALCULATION OF ABSOLUTE GRADING

Grade	O	A+	A	B	C	D	E	F
Marks	≥ 90	82-89	73 - 81	65 - 72	57 - 64	48 - 56	40 - 47	< 40

(xi) In case the number of students is too small (less than 30), and relative grading on the basis of statistical parameters is not feasible, a modified absolute grading scheme as given below will be followed.

CALCULATION OF MODIFIED ABSOLUTE GRADING

THEORY SUBJECT

Step 1 : O grade to be awarded only <=10% of the class who are above Upper Cutoff and minimum Upper Cutoff is 90. Number of 10% students in the class will be calculated using roundup. For example 12 student in class means 2 students can get highest grade.

Step 2: Case I- (more than 10% students are above or equal to 90)

If a next higher mark scored is more than 90 then actual scored number will be treated as next higher number for example if the next scored marks is 93 then subtract 39 from 93 (93-39=54). Then divide 54 by 6 (because there are six grades A+, A, B, C, D, E), which will be equal to '9' that is the class-Interval.

Add 7 (1 Delta) to 39 = 46, then the range will be as follows:-

Case-I
Add 9 to 39 = 48
Add 18 to 39 = 57
Add 27 to 39 = 66
Add 36 to 39 = 75
Add 45 to 39 = 84

Case II- (less than 10% students are above or equal to 90)

If next higher marks scored less than 90 then 90 will be fixed as next higher number for example if the next scored marks is 87 then subtract 39 from 90 = 51 than divide 51 by 6 (because there are six grades A+, A, B, C, D, E), which will be equal to '8.5' that is the class-Interval

Add 8.5 (1 Delta) to 39 = 47.5 = 48, then, the range will be as follows:-

Case-II
Add 08.5 to 39 = 48
Add 17 to 39 = 56
Add 25.5 to 39 = 65
Add 34 to 39 = 73
Add 42.5 to 39= 82

The grade calculation is as follows:-

Case I	Grade	Case II
40-48	E	40-48
49-57	D	49-56

Reason for establishment of off campus and justification:

1. **Expanding Access to Higher Education:**

   India's Gross Enrollment Ratio (GER) in higher education is only 28.3%, while the national goal is to raise it to 50% by 2035. In Rajasthan, the GER is slightly higher at 28.6% but still below the national target. Establishing an off-campus in Alwar will help increase access to higher education, particularly in underserved regions like Alwar and its surroundings, contributing to the country's GER objectives.

2. **Addressing Regional Educational Needs:**
   Rajasthan has approx. 90 Universities, yet the demand for quality higher education remains unmet, especially in the NCR-adjacent areas. An off-campus in Alwar will provide quality education opportunities for students from surrounding cities (Agra, Mathura, Bharatpur, Rewari, etc.), reducing the need for students to travel out of state for higher studies.

3. **High Unemployment and Need for Skill Education:**

   Alwar, located in the well-known Mewat region, is a socially and economically backward area where a large number of youth remain unemployed. The key reasons include low educational attainment, limited access to quality higher education, and a mismatch between students' skills and the requirements of nearby industrial hubs such as Bhiwadi and Neemrana. Establishing the Off-Campus of JECRC University in Alwar aims to address these challenges by providing access to quality education and industry-oriented skill development at the doorstep of local students. This initiative will enhance their employability, promote local industry linkage, and contribute significantly to the socio-economic upliftment of the people of the Mewat region.

4. **Proximity to NCR and Industry Alignment:**

   Alwar's strategic location near the NCR makes it ideal for offering academic programs that align with the industrial and economic growth in the region. This proximity will enable students to benefit from internship and placement opportunities in one of India's largest economic hubs, improving their employability.

5. **Bridging the Skills Gap:**

   Rajasthan's industrial sector faces a shortage of skilled professionals. JECRC University's off-campus in Alwar will offer industry-aligned programs, particularly in fields like Engineering, Computer Science, AI, and Cybersecurity, which will prepare students to meet the demands of local industries and address the region's skills gap.

6. **Proven Success in Employment and Placements:**

   JECRC University has a proven track record of eligible students securing placements annually. Establishing an off-campus in Alwar will replicate this success by providing skilled graduates to meet the demands of the NCR and Rajasthan industrial sectors.

7. **Fostering Research and Innovation:**

   With JECRC's strong focus on research, the Alwar campus will foster a research-driven academic environment that supports applied research to solve real-world industrial problems, further contributing to the region's development.

Registrar
JECRC University, Jaipur-303905

8. **Supporting Entrepreneurship and Economic Growth:**

   JECRC's Entrepreneurship Development and Incubation Centre has nurtured numerous startups. Expanding this initiative to Alwar will support local entrepreneurship, driving economic growth in the region while also offering students hands-on entrepreneurial experience.

9. **Community Engagement and Holistic Student Development:**

   Through various clubs, societies, and community engagement programs, JECRC promotes not just academic skills but also social and leadership skills. An off-campus in Alwar will foster a vibrant academic community and contribute to the overall development of students.

10. **Catering to Future Industry Trends:**

    The Alwar off-campus will anticipate future trends by offering programs in emerging fields like AI, Data Analytics, and Cloud Computing. This will ensure that graduates are equipped with skills that meet not only current but also future industry demands.

11. **Enhanced National and International Exposure:**

    Students at the Alwar campus will benefit from national and international training opportunities, helping to elevate their global competitiveness and adding value to the region's talent pool.

These academic reasons highlight the need and potential benefits of establishing the off-campus in Alwar, ensuring regional educational development while supporting the broader goal of increasing India's GER and meeting industry demands.

LAB SUBJECT

Lab Grading: Marks will be submitted out of 100 and system of relative/absolute/modified absolute grading will be followed as per theory papers. Two evaluation methods will be used as follows:-

c. In semester- 50 marks
d. End semester-50 marks

The teacher in consultation with his HOD will decide the cut off marks for grades. Any other peculiarities may also be taken care of by having a discussion with the HOD/HOI.

(xi) In the end semester examinations student will be treated as 'Failed,' if the marks are less than 40%.
(xii) For failed students maximum grade allowed is C.
(xiii) In all grading system, less than or equal to 10% of the class will get **O** provided they have scored 90%. However if last student of 10% **O** range is having students at the same number then they will also get **O** and we will have more than 10% **O** grade in this case. Number of 10% students in the class will be calculated using roundup. For example 12 student in class means 2 students can get highest grade.

Note: For AHS department subjects passing marks is 50% in End Sem as well as in Total marks also 50%. So lower cutoff will be 50 for passing in AHS subjects.

4.6. ***Grade Point Average (GPA) and Cumulative Grade Point Average (CGPA):*** The performance of a student in a semester is indicated by a number called GPA (Grade Point Average). The GPA is the weighted average of the grade points obtained in all the subjects taken by the student during the semester.

An up to date assessment of the overall performance of a student since the time he joined the course is obtained by calculating a number called CGPA. The CGPA is weighted average of the grade points obtained in all the subjects studied by the student since he joined the course. The CGPA will also be calculated at the end of every semester to two

decimal places and will be indicated on grade reports.

GPA and CGPA can be calculated by the following equations:

GPA

Grade points in a subject: Grade achieved by the student in that subject x Credits for that subject.

S = sum of grade points for the student for the semester.

C = total number of credits for the semester

GPA = S/C

CGPA

Semester grade points = GPA x C

S_{total} = Sum of semester grade points for all semesters completed at the point.

C_{total} = Sum of credits of all semesters completed at the point

CGPA = S_{total}/C_{total}

5. Promotion to a Higher Semester

Employment Possibilities of pass out students from the off-campus centre. Give details of any survey / study conducted in this regard.

The employment prospects for students graduating from the proposed Off-Campus Centre at Alwar are highly encouraging, supported by Rajasthan's industrial growth, proactive state policies, and strong alignment of academic offerings with market needs. The following points highlight the strategic advantages and institutional approach in this regard:

1. Industrial and Economic Growth in Rajasthan

Rajasthan presents a robust industrial and economic environment that supports employment across a wide range of sectors:

- **Strategic Location**: Proximity to the National Capital Region (NCR), along with excellent road, rail, and air connectivity, makes Rajasthan – and Alwar in particular – a preferred destination for industries and skilled manpower.
- **Economic Growth**: With a Gross State Domestic Product (GSDP) projected at ₹15.7 lakh crore (US$ 188.32 billion) in 2023–24 and a consistent growth trajectory (CAGR of 11%), Rajasthan offers ample opportunities for employment and entrepreneurship.
- **Tertiary Sector Expansion**: Services such as IT, communication, financial services, logistics, and administration have witnessed consistent growth, leading to high demand for graduates with relevant skills.
- **FDI and Ease of Doing Business**: Rajasthan ranks among the top Indian states in ease of doing business and has attracted over US$ 2.3 billion in FDI (Oct 2019 – Mar 2024), increasing employment avenues for skilled youth.

2. Local Industrial Scenario at Alwar

Alwar is one of Rajasthan's most industrialized districts, offering a strong ecosystem for job placement, internships, and industry collaborations:

- **RIICO Industrial Areas** in Matsya, Bhiwadi, and Neemrana house industries in automotive, manufacturing, electronics, packaging, and FMCG sectors.
- Reputed companies such as **Honda, Havells, Ashok Leyland, Parle Agro, Shree Cement, and PepsiCo** are operational in the region.
- The district is also part of the **Delhi-Mumbai Industrial Corridor (DMIC)**, including the **Khushkhera-Bhiwadi-Neemrana Investment Region (KBNIR)**, enhancing its strategic importance.

The university is actively engaging with these industries for internship programs, industrial training, and placement opportunities for students.

3. Alignment of Academic Programs with Industry Needs

The proposed academic programs at the Alwar Off-Campus have been carefully designed to meet the current and emerging needs of industries:

- **Technology Programs**: B.Tech (CSE and Specializations), BCA, MCA, and M.Tech focus on skills in AI, Data Science, Cyber Security, and Cloud Computing – areas with growing job demand.
- **Management and Commerce**: BBA, B.Com, and MBA programs are designed to cater to roles in business analytics, operations, sales, marketing, finance, and human resource management.
- **Pharmacy**: With a growing demand for healthcare professionals and the pharmaceutical sector's expansion, these programs provide excellent career paths.
- Emphasis is placed on industry-relevant curriculum, hands-on learning, and mandatory internships to improve employability.
